

Tax Refunds

Make sure you receive yours!

If you are due to receive an electronically credited tax refund, we want to make sure you receive it.

Whether you prepare your own taxes or have a tax consultant, please make sure you verify the routing and transit number is correct (322174795) and that your account information is correct.

If you are choosing to credit your checking, simply use the numbers on the bottom of your checks.

Do you prefer to have your refund deposited to something other than your checking? Or would you like to double check your information? Simply contact our eServices Team during business hours at (520) 887.5010 and a representative will be more than happy to help you.
